PT 113
REACH Compliance Statement
October 15, 2026

Subject: REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals)

Pure T has reviewed its products with respect to the European Union's REACH Regulation (REACH 173).

Pure T products are classified as "articles" under the EU REACH Regulation. Under normal and reasonably foreseeable conditions of use, these products are not intended to release any Substances of Very High Concern (SVHCs) into the environment. Accordingly, the substance registration and authorisation requirements under REACH are not considered applicable to these products on this basis.

As part of its REACH assessment, Pure T has reviewed the materials used in its valves and, based on the information available as of October 2026, has not identified any substances included on the Candidate List of Substances of Very High Concern (SVHCs). This assessment is based on material certificates for purchased components and REACH compliance declarations provided by our suppliers.

To the best of our knowledge, the information used in this assessment is reliable. Based on the results of this review, Pure T considers its products compliant with the applicable EU REACH requirements concerning SVHCs.

As the SVHC Candidate List is updated periodically, Pure T will continue to monitor relevant regulatory updates and review its products as appropriate to maintain compliance with applicable REACH requirements.
